WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

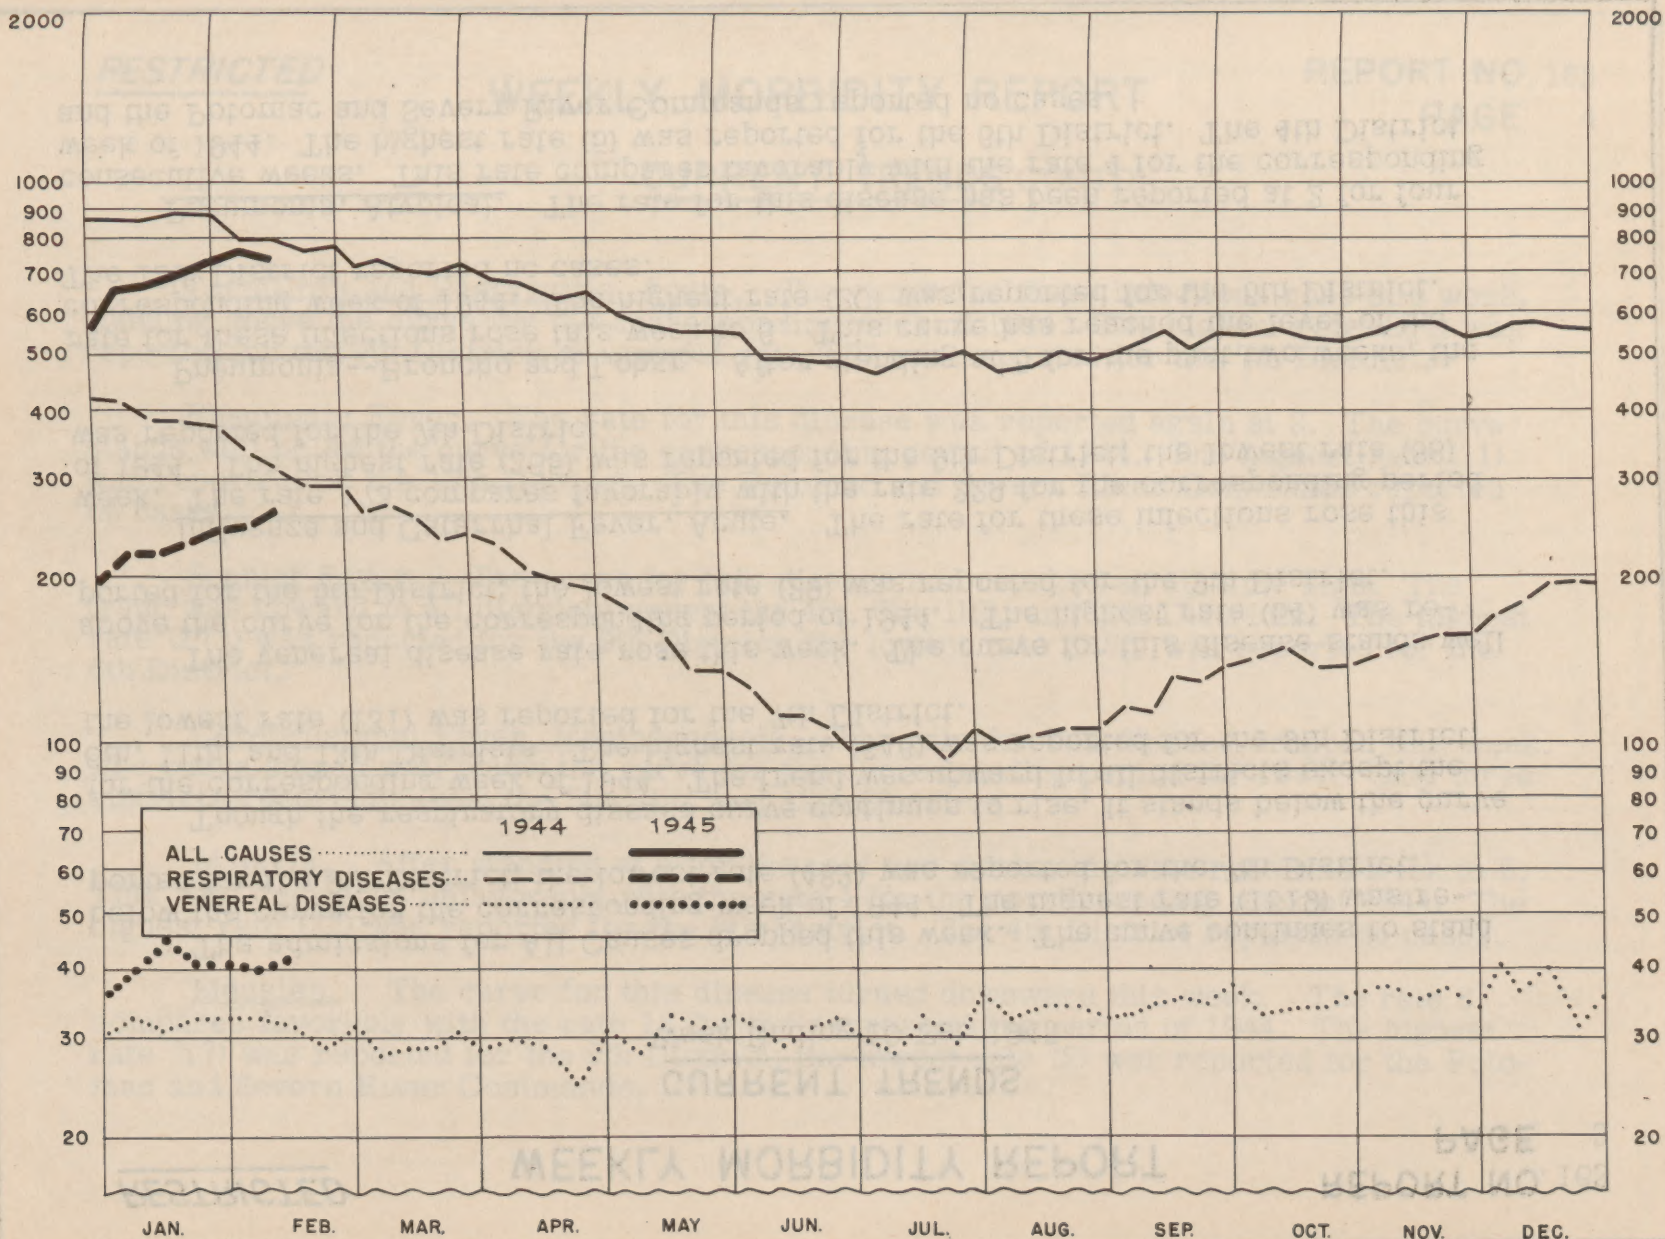

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 10 Feb 1945

The admissions for All Causes dropped this week. The curve continues to stand below the curve for the corresponding week of 1944. The highest rate (1519) was reported for the 9th District; the lowest rate (483) was reported for the 7th District.

Though the respiratory disease curve continues to rise, it stands below the curve for the corresponding week of 1944. The trend was upward in all districts except the 6th, 11th, and 13th Districts. The highest rate (646) was reported for the 9th District; the lowest rate (131) was reported for the 7th District.

The venereal disease rate rose this week. The curve for this disease stands well above the curve for the corresponding period of 1944. The highest rate (54) was reported for the 5th District; the lowest rate (29) was reported for the 9th District.

Influenza and Catarrhal Fever, Acute. The rate for these infections rose this week. The rate 173 compares favorably with the rate 229 for the corresponding period of 1944. The highest rate (365) was reported for the 9th District; the lowest rate (88) was reported for the 7th District.

Pneumonia--Broncho and Lobar. After standing at 5 for the past two weeks, the rate for these infections rose this week to 6. This curve has reached the level of the corresponding week of 1944. The highest rate (20) was reported for the 5th District. The 12th District reported no cases.

Pneumonia, Atypical. The rate for this disease has been reported at 2 for four consecutive weeks. This rate compares favorably with the rate 4 for the corresponding week of 1944. The highest rate (5) was reported for the 6th District. The 4th District and the Potomac and Severn River Commands reported no cases.

PAGE 4

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The curve for these infections rose this week, standing above the curve for the corresponding week of 1944. The highest rate (261) was reported for the 9th District; the lowest rate (37) was reported for the 7th District.

Rheumatic Fever. The rate for this disease was reported again at 2. The curve stands well below the curve for the corresponding period of 1944. The highest rate (11) was reported for the 13th District. The Potomac and Severn River Commands reported no cases.

Scarlet Fever. The curve for this disease has reached an all time high. The trend was upward in all districts except the 4th, 6th, 11th, and 13th Districts. The highest rate (273) was reported for the 9th District; the lowest rate (0.75) was reported for the 6th District.

Cerebrospinal Fever, Meningococcic. The rate for this disease dropped this week. The curve stands well below the curve for the corresponding period for 1944. Only three districts reported cases; the 5th, 11th, and 12th Districts.

Malaria. After standing at 4 for the past two weeks, the rate rose this week to 5. This rate compares unfavorably with the rate 4 for the corresponding week of 1944. The highest rate (22) was reported for the 6th District. The 4th District reported no cases.

Measles. The curve for this disease turned downward this week. The rate 8 compares favorably with the rate 18 for the corresponding period of 1944. The highest rate (17) was reported for the 9th District; the lowest rate (2) was reported for the Potomac and Severn River Commands.
